How to choose a wattage inverter?

1.Firstly,Size the Right Power Output. Inverters will be rated by a wattage value. According to this code,if there were 1000 Watt air conditioning and 800 Watt fridge; These electronics would be counted as 1800 Watts then require an inverter over 1800W. In this case,Leaptrend 2000W and 3000W inverters can perfectly cover your power needs.

Which Inverter should I Choose?

If your applications are inductive loads,please choose the inverter whose continuous power is 3-7 times higherthan the Watts of your appliances. If you want to power up to one refrigerator,we suggest you use 10 times higher power inverter. 4. Please turn off the load first then turn off the inverter.

Does aims inverter accept 12V?
