

Are there 5G base stations in Somalia

Is 5G a major technological milestone in Somalia?

Credit SUPPLIED MOGADISHU (HOL) -- A major technological milestone was reached in Somalia on Thursday as Hormuud Telecom unveiled its 5G services, catapulting the East African nation into a new era of digital connectivity.

Does Hormuud Telecom have a 5G network?

Hormuud Telecom is optimistic about the future, citing an existing 4G network that serves 70% of the population. The company anticipates an increase in coverage, with 5G services reaching 88% of urban dwellers and approximately 70% of rural communities within a year.

Will 5G reach 80% of urban dwellers in a year?

The company anticipates an increase in coverage, with 5G services reaching 88% of urban dwellers and approximately 70% of rural communities within a year. The launch of the 5G network promises faster and more reliable internet services, with the company claiming over 80% coverage capability in its initial statement.

Why is Hormuud moving to 5G?

Hormuud's 5G service promises unparalleled speeds and reliability. It supports a range of applications, from healthcare and education to agriculture, potentially transforming everyday lives. Additionally, this move aligns with Somalia's goals of integrating more fully into the East African Community and fostering regional trade.

Will 5G help a cashless economy?

Despite challenges, including ongoing insurgency and infrastructural needs, the introduction of 5G is seen as a cornerstone for rebuilding and modernization. Hormuud Telecom, leveraging its extensive infrastructure, envisions a cashless economy facilitated by rapid, secure internet access.
