

Are there any new energy base stations in the Czech Republic

How many nuclear power plants does the Czech Republic have?

The Czech Republic operates two nuclear power plants: Temelín and Dukovany. As of 2019 the government intends to increase the share of nuclear electricity production from 30 % to 58 %. To this end, a new reactor is to be constructed at the Dukovany site, which will replace older units by 2035.

Do Czechs support nuclear power expansion?

Most Czechs support further expansion of nuclear power use, with support at 60 % in 2007. Those living near nuclear waste storage facilities argue that proposals for expansion of nuclear power block development of such areas, discourage investment and make the areas unattractive for tourists. [citation needed]

Where does the Czech Republic buy oil & gas?

The country is integrated into regional transmission systems and can purchase oil and gas from different countries based on market prices in Rotterdam or elsewhere. Most oil and gas are imported via Germany. The Czech Republic has two nuclear power plants at Dukovany and Temelín, which delivered over 31 TWh of electricity in 2022.

What does the Stade terminal mean for the Czech Republic?

This represents an investment in the further development of the Czech energy sector, and strengthens the energy security of the Czech Republic. The Stade terminal will be located near Hamburg at the mouth of the Elbe River on the North Sea and will be commissioned by its operator, Hanseatic Energy Hub, in mid-2027.

Will Dukovany nuclear power station shut down in 2035?

In 2019, the Czech government gave preliminary approval for at least one new nuclear power unit at Dukovany Nuclear Power Station for about 2035 to replace four units expected to shut down between 2035 and 2037.

How much gas has the Czech Republic saved compared to last year?

This year too, around 700 million cubic metres (around 10 percent) were saved compared to last year. This reduction in gas consumption has significantly contributed to the Czech Republic being able to do without gas imports from Russia.
