

Are there subsidies for energy storage projects in Albania

Who is responsible for implementing energy policies in Albania?

The Ministry of Infrastructure and Energy is responsible for formulating and implementing energy policies in Albania. It plays a key role in shaping the regulatory framework, energy development plans, and strategies for the sector. 2. Regulatory Authority for Energy (ERE):

How can Albania solve the energy crisis?

In addition to eliminating the electricity deficit and taking electrification to new sectors, Albania can increase its potential to unlock new industries and investment using clean energy. The country can explore opportunities to produce green hydrogen through solar and wind power.

Are energy imports a problem in Albania?

Energy imports do not only have an adverse impact on the country's trade deficit, but they also pose significant risks to the country's energy security. Today, Albania remains a net energy importer as domestic energy production is not able to meet demand.

Who is responsible for electricity production in Albania?

Albanian Power Corporation (KESH): The Albanian Power Corporation is the state-owned company responsible for electricity generation. KESH operates hydropower plants and contributes significantly to Albania's electricity production. 6. Albanian Transmission System Operator (OST SH.A.):

Does Albania have a power supply security problem?

Albania is a net importer of electricity; power supply security is a challenge. Albania's domestic generation is almost entirely dependent on hydropower since the country's only thermal power plant is currently inoperable.
