Will the US impose tariffs on solar panels from South East Asian countries?

The US Commerce Department has announced plans to impose tariffs of up to 3,521% on imports of solar panels from four South East Asian countries. It comes after an investigation that began a year ago when several major solar equipment producers asked the administration of then-President Joe Biden to protect their US operations.

Will US impose new anti-dumping tariffs on Chinese solar panels?

The US has imposed new anti-dumping tariffs on solar panels made by a number of Chinese companies in four Southeast Asian countries.

How did Chinese solar panels avoid tariffs?

Companies Were Avoiding Tariffs The U.S. had already imposed taxes on Chinese solar panel makers when they sold products to American buyers. To avoid those tariffs, the companies began using factories in Southeast Asia. However, the same Chinese companies own or control many of those factories.

Are Chinese companies dumping cheap solar panels on the US market?

Sebastian Strangio is Southeast Asia editor at The Diplomat. U.S.-based manufacturers say that Chinese companies based in Cambodia, Vietnam, Thailand, and Malaysia are dumping cheap solar panels on the American market.

Are Chinese solar panels uncompetitive?

The petitioner group, the American Alliance for Solar Manufacturing Trade Committee, accused big Chinese solar panel makers with factories in Malaysia, Cambodia, Thailand and Vietnam of shipping panels priced below their cost of production and of receiving unfair subsidies that make American goods uncompetitive.

Where are solar panels made?
