

Australia Southern Energy Storage Project

How does South Australia support energy storage projects?

The battery delivers power to the National Electricity Market, providing system security services. The Government of South Australia supports energy storage projects through programs and funding. The \$50 million Grid Scale Storage Fund and South Australia's Virtual Power Plant are key components of the South Australian government's energy policy.

When will a battery energy storage system start in South Australia?

The 250MW/500MWh battery energy storage system (BESS), supplied by Trina Storage, is scheduled to commence commercial operations in February 2027. Once operation, it will be one of the largest energy storage projects in South Australia, marking a significant milestone in the region's renewable energy transition.

What are the key components of South Australia's energy policy?

The \$50 million Grid Scale Storage Fund and South Australia's Virtual Power Plant are key components of the South Australian government's energy policy. Existing Energy Storage Projects: Learn more about energy storage on the Clean Energy Council website.

What are the different types of energy storage?

There are a range of methods and technologies to store energy. This can include batteries, flywheels, compressed air, thermal and pumped hydro. Coupling energy storage with renewable energy provides stability services and emergency back-up power if a shortfall in energy is predicted.

Once operation, it will be one of the largest energy storage projects in South Australia, marking a significant milestone in the region's renewable energy transition.

Australia is home to the world's first "big" battery: the 100 MW Hornsdale Power Reserve, constructed in 2017. Since then, investment in grid-scale battery ...

The Government of South Australia supports energy storage projects through programs and funding. The \$50 million Grid Scale Storage Fund and South Australia's Virtual Power Plant ...

EnergyAustralia has welcomed today's announcement from the Commonwealth Government that it will support its two major battery storage projects in Victoria and South ...

2 days ago; Snowy 2.0, the largest renewable energy and pumped storage project in the southern hemisphere, is scheduled for delivery in 2027 - the same year Sydney welcomes the ...

12 hours ago; A major milestone has been reached for a \$350 million South Australian battery storage

project, with construction underway and completion scheduled for end of 2026.

The project, in partnership with ZEN Energy as the client and Shanxi Electric Power Construction (SEPC) as the consortium partner, marks SA's second largest energy storage and the second ...

The Wooreen Energy Storage System project will provide an economic boost for the Gippsland region and help transition to renewable energy. It's early days, but we believe a new utility ...

1 day ago· HiTHIUM, a leading global company in energy storage technology, announced the deployment of energy storage systems with a total capacity of 500MWh in Victoria, Australia ...

2 days ago· Renewables developer X-Elio is seeking Australian government approval for a four-hour battery energy storage system to be built in southern New South Wales after scrapping ...

Australian energy major AGL Energy has acquired the Yadnarie solar thermal project in South Australia from Photon Energy, featuring 720MWh of long-duration energy ...

PRESS RELEASE - Trina Storage recently announced a significant collaboration with Pacific Green, a globally renowned energy storage developer. Together, they are working ...

2 days ago· The Koorangie BESS (pictured) features 100 Tesla Megapack units equipped with grid-forming inverters. Image: Edify Energy. Tesla has announced that by the end of 2026, it ...

2 minutes ago· SunCable has confirmed its large-scale renewable and energy storage project in Australia's Northern Territory could be operational before 2030, following a "pragmatic" ...

To bring this project to life, TransAlta engaged our team to serve as the project management consultant on this transformational effort. Our services included ...

Two Australian clean energy developers and investors have announced plans to build a portfolio of 27 small battery storage projects across three Australian states.
