How much does a battery management system BMS cost?

You can expect to pay between 1.6 to 200 for each Battery Management System Bms. The cost of a Battery Management System Bms varies by the different parameters. Meet China Battery Management System Bms manufacturers, wholesalers, exporters featured in the Consumer Electronics industry from China.

How much does a BMS cost?

Average active BMS price range: \$500-\$2,000. Hybrid BMS - As the name implies, hybrid BMS combines elements of both passive and active systems. This allows optimized functionality per cell at lower costs than purely active BMS. Hybrid systems actively balance while monitoring voltages, while allowing passive shunting on cell voltage thresholds.

How much does a hybrid battery management system cost?

With almost full capabilities at partial costs, hybrid BMS presents excellent middle-ground options for many lithium battery applications. Average hybrid BMS price range: \$800-\$1,500. Capabilities and pricing can vary widely for BMS. Here are 6 of the leading global manufacturers serving both consumer and industrial lithium battery markets:

What is a BMS battery pack?

The BMS is configured for a battery pack are composed of A123 LiFePO4 cylindrical batteries in 12S8P configuration. The A123 cells have the following characteristics:

How much does a passive battery management system cost?

Key functions include overcharge protection, undervoltage protection, and balancing cells. Passive BMS offers adequate safety for smaller battery banks in low-budget projects. Average passive BMS price range: \$100-\$500.

What factors affect BMS pricing?

Scale of System- The size of the battery bank and the capacity that the BMS must handle also impact costs. Prices increase with higher voltage, amp capacities, and parallel/series configurations. Battery Voltage - BMS pricing often correlates to common battery voltages used.
