Why do MSOs need a modular enclosure?

As MSOs move out into smaller, cabinet arrangements that support a mix of active (power, battery and nodes) and passive equipment (fiber terminations and splitters), modular enclosures allow for mix-and-match compartments to fit site requirements.

What are the different types of battery backup cabinets?

Battery strings can be disconnected and moved with minimal to no network disruption. 12V Battery Backup (BBU) cabinets ideal when a large battery backup is required. Composite Pads (CPAD) have replaced poured-in-place or pre-cast concrete pads because they enable more rapid network deployment.
