

Container distribution cabinet safety

What are storage safety cabinets?

Storage safety cabinets are cabinets used to store hazardous chemicals such as acids, bases, oxidizers, flammable, and other types of chemicals. Many storage safety cabinets are manufactured to store specific types of hazardous chemicals. Their purpose is:

Why do you need a dangerous goods storage cabinet?

At RSEA Safety, we supply dangerous goods storage cabinets to keep hazardous materials secure and organised on your site. Whether you're handling flammable liquids, corrosive substances, pesticides, or toxic chemicals, the right cabinet helps you store them safely and meet workplace safety rules.

Are storage cabinets regulated?

Storage safety cabinets are often regulated under local fire codes. Requirements may also be specified in the jurisdiction's health and safety legislation and substance-specific regulations or standard. For example, British Columbia's Occupational Health and Safety Regulations include mention of approved storage cabinets in Sections 5.33 to 5.35.

How many storage safety cabinets can be present?

Yes. The maximum number of cabinets that can be present will vary for different occupancies and hazard classifications of the chemicals. For example: Table 2: Number of Storage Safety Cabinets (from the National Fire Code of Canada) Can incompatible materials be stored in the same storage safety cabinet?

How should a storage safety cabinet be labelled?

Storage safety cabinets for other hazardous chemicals must also be labelled according to health and safety legislation, WHMIS requirements, or safe industry practices. Labels should state the type of hazardous chemical stored in the safety cabinet. For example, WHMIS pictograms can be used.

What are flammable liquid storage safety cabinets?

Flammable liquid storage safety cabinets are cabinets that are specifically designed for the storage of flammable liquids. These cabinets provide temporary protection from a fire. For the cabinet to be effective, it must be used according to local fire code requirements and the manufacturer's instructions. Are storage safety cabinets regulated?
