

Container outdoor power ceiling

Where can a big air 45 container vent be installed?

The BIG AIR 45 Container Vent with Bug Screen is engineered to be installed anywhere on shipping container sidewalls, end walls, or doors- from floor to ceiling. ? Other vent designs can only be installed right up against the top rail of containers and stick out up to 4? causing the container doors to damage the vents when they fully swing open.

How many vents does a container have?

Typically, used containers have between 2 and 4 vents and the actual total air passage hole is about the size of a dime. These vents are designed to keep seawater out and are meant more as a method to equalize pressure than exchange air. As an Amazon Associate, we earn from qualifying purchases.

Do shipping container vents prevent condensation?

The variables inside a shipping container are always changing. When the combination of those variables creates an environment prone to humidity, condensation will happen. Unfortunately, stock container vents are not enough to prevent condensation.

Are stock container vents enough to prevent condensation?

Unfortunately, stock container vents are not enough to prevent condensation. Typically, used containers have between 2 and 4 vents and the actual total air passage hole is about the size of a dime. These vents are designed to keep seawater out and are meant more as a method to equalize pressure than exchange air.
