Are high-efficiency solar panels worth the extra cost?

Yes, high-efficiency solar panels are worth the extra cost in most cases. While high-efficiency panels cost more upfront, their improved energy output and durability often result in greater long-term savings, making them a smart investment for maximizing ROI. How long do high-efficiency solar panels last?

Are solar panels cheaper than a professional installation company?

Yes and no. Solar panel kits are much more affordable than having a professional installation company install a solar array for you. However, affordability upfront isn't the only factor. Trying to take your home off-grid is a huge task that most people, frankly, aren't up to.

Are low-cost solar panels worth it?

However, there is still a decent range in price between the cheapest solar panels and the most expensive options. Whether you're a homeowner who's trying to work within a fixed budget or you're a frugal shopper who appreciates a great value, low-cost solar panels may very well be the best option for your home.

Are cheaper solar panels a good option?

In many cases, yes, opting for cheaper solar panels can be an outstanding option. While high-performance panels from companies like Maxison (formerly SunPower), Trina Solar, Tesla, Panasonic and REC will help you maximize your energy savings over time, they also come at significantly higher per-watt prices.
