

Djibouti supports the grid-connected construction of communication base station inverters

Is Djibouti Telecom creating a digital platform?

Djibouti Telecom, under the direction of its Director General Mohamed Assoweh Bouh, is building a digital platform for the region. Wingu.Africa has partnered with Djibouti ISP TO7 Network to develop a carrier-neutral data center and carrier-neutral cable landing station.

Is Djibouti connected to the world?

Djibouti is the fourth-most-connected country in Africa and a leader in connectivity in East Africa and the Horn of Africa. Subsea cables running through Asia, Africa and Europe connect the country to the world. A total of nine subsea data cable systems have been laid.

Is Djibouti a data centre?

Since 2013 the country has housed the Djibouti Data Centre, the first data centre in the Horn of Africa and the first Tier-3 data centre in East Africa. In October 2021 data centre services company Wingu.Africa partnered with Djibouti ISP TO7 Network to build a new carrier-neutral data centre and cable landing station in the capital.

Is Djibouti Telecom building a new cable landing station?

Djibouti Telecom has begun construction on a new Cable Landing Station in Djibouti City. The CLS will consist of three floors, with each floor having a 250 square meter (2,690 sq ft) equipment room. The 3rd floor is reportedly reserved for colocation. The facility is expected to be completed by April 2022.

Does Djibouti have a strategic location in the Horn of Africa?

Djibouti has tapped into the advantages of its strategic location in the Horn of Africa, on the Bab Al Mandab Strait at the entrance of the Red Sea, with important implications for its ICT sector.

Will Djibouti launch a carrier-neutral data center?

Wingu.Africa, in partnership with Djibouti ISP TO7 Network, is developing a carrier-neutral data center and carrier-neutral cable landing station in Djibouti. Details about the facility weren't shared, but it is expected to be ready for operation in early 2022.
