

Emergency Communication Mobile Super Base Station

This paper analyses the current situation of railway emergency communication, investigates the existing emergency communication scheduling algorithm, designs an ...

We propose a mechanism to deploy UAVs as aerial base stations to provide network connectivity, QoS support, and reliable communication in a flash crowd and ...

ZTE has developed a robust and flexible base station solution that can use satellite or wireless technologies to provide a backhaul connection to both a dedicated core network for the ...

ASTRI has succeeded in producing a mobile base station that allows for cost-efficient, low-latency, and stable mission-critical mobile broadband communications for emergency services.

Traditional base stations typically only support specific frequency bands, have limited transmission distance, and are weak in functions such as network self-organization and ...

In this work, we present a quantitative network performance comparison between a fixed base station and a movable base station, when a group of first responders is moving in a ...

Base stations are a great way to stay connected, especially during an emergency. We have base station radios, antennas, and microphones! Same with a vehicle antenna, the longer and ...

In the world of radio communications, a radio base station plays a vital role in ensuring reliable and seamless communication across a wide area. Whether used in mobile networks, ...

Movable Base Stations in Mobile Networks for Emergency Communications Published in: 2023 IEEE 34th Annual International Symposium on Personal, Indoor and Mobile Radio ...

Compared with indoor base stations, vehicle mounted base stations are suitable for outdoor environments and provide services for emergency communication, mobile ...

Emergency base station cabins play a crucial role in ensuring effective communication and coordination during emergencies. Their rapid deployment, flexibility, ...

The Cell on Wheels (COW) is a portable base station used to provide temporary cellular network coverage for high-profile events and emergency situations ...

Emergency Communication Mobile Super Base Station

A mobile base station, also called a base transceiver station (BTS), is a fixed radio transceiver in any mobile communication network or wide area network (WAN). The base station connects ...

In disaster relief operations, both emergency communication and personnel positioning are critical. This paper proposes an enhanced unscented Kalman filter (UKF) positioning algorithm ...

The primary function of a base station is to transmit and receive radio signals to and from mobile devices, enabling voice and data services. Base stations are typically ...

AlertMedia's alert notification software lets businesses communicate quickly and reliably. Get critical alerts out to your people in just a few clicks.
