

Ethiopia communication base station electricity price

How much electricity does Ethiopia use a year?

Households that use less than 50 kilowatt hours (kWh) at 0.27 birr will see their tariffs climb to 1.56 birr as the four-year program is completed by 2027/28. Per capita electricity consumption is 140 kWh per year in Ethiopia, which is only 5 percent of the global average of 33,131 kWh.

How many Ethiopians have access to electricity?

While EEU has indicated plans to provide electricity access to nearly 7.8 million households by the end of 2030, only around half of Ethiopians currently have access to electricity. Concerns about mounting inflation rates, which have worsened following the floating of the Ethiopian birr, are likely not allayed by the tariff announcements.

What is the electricity price in Ethiopia?

The residential electricity price in Ethiopia is ETB 0.658 per kWh or USD 0.005. The electricity price for businesses is ETB 1.611 kWh or USD 0.012. These retail prices were collected in December 2024 and include the cost of power, distribution and transmission, and all taxes and fees. Compare Ethiopia with 150 other countries.

How much does EEPCO charge per kWh?

In 2006, EEPCO adjusted the tariff to USD 0.07 per kWh. Due to devaluation by 2018, the tariff reached USD 0.0181 per kWh. In 2018, the average tariff was readjusted to Birr 2 per kWh (0.07 USD per kWh*). Due to the devaluation of Birr against USD, the average electricity tariff is currently 0.03 USD per kWh** High Voltage Industry Tariff.
