

What is France's energy mix?

The graph represents the evolution of France's energy mix, with an annual and monthly view of electricity generation in France, overall and by technology. The French energy mix is essentially made up of nuclear, hydroelectric and fossil-fired power plants, as well as renewable energies (wind power, photovoltaic solar power, biomass).

Which power stations are closed in France?

The following page lists all power stations in France. Unit 1 closed in February 2020 and Unit 2 in June. Marcoule nuclear site. G1 is the yellow building 297 m tall chimney, managed by GazelEnergie. Unit 4 b in partial operation with coal units decommissioned.

How does French power production change in 2022 & 2023?

French power production continues to change in 2022 and 2023, driven by the growth in renewable energy sources. This graph represents the evolution of the French energy mix, with a view to the evolution of installed generation capacity in France, overall and by technology.

How many MWP is a photovoltaic plant in France?

Built on 127 hectares of former gravel pits, the park comprises over 135,000 photovoltaic modules installed on state-of-the-art floating platforms developed in France. With a total capacity of 74.3 MWp, the plant will generate enough renewable electricity to supply 37,000 people every year.

Is SNCF a producer of electricity?

SNCF Group has now been identified as a producer of electricity. We're currently rolling out mini solar demonstrators, most on railway properties from trackside areas to embankments, fences, between-rail spaces and sleepers. Their photovoltaic panels will be tested for a year and monitored by sensors to assess energy output and durability.

Will SNCF Renouvelables be a key player in regional industrial development?

SNCF Renouvelables is set to take its place as a key player in regional industrial development. In 2024 it signed the French State's Solar Pact, designed to encourage the emergence of a nationwide photovoltaic industry--a major focus of industrial development in the years ahead.

VSB & Energies nouvelles, an independent producer of electricity from renewable sources and the French arm of the VSB Group, announces the start of construction of three ...

After several months of negotiations, a major agreement has been reached between GazelEnergie, a subsidiary of the Czech group EPH, and the state to ...

French new energy station 125kWh

3 days ago; The new sites include four wind farms and one solar plant across Hauts-de-France, Normandy, and Nouvelle-Aquitaine. Construction began in 2024 following RWE's success in ...

The new distributed generation (DG) unit will offer tailored solutions for rooftop, ground-mount and carport photovoltaic (PV) installations, as well as solar storage, electric ...

In addition to home recharging, frequent use of public recharging points is usually for occasional or longer trips. In the first instance, a public ...

Wind turbines in Champagne-Ardenne. In 2021 France reached a total of 18,676 megawatts (MW) installed wind power capacity [1] placing France at that time as the world's seventh largest ...

A pioneer in the continent's carbon-neutral strategy by 2050, it is investing intensively in research and innovation. French cities such as Paris, Nantes and Bordeaux are ...

After several months of negotiations, a major agreement has been reached between GazelEnergie, a subsidiary of the Czech group EPH, and the state to restart the Gardanne ...

The GSL-CESS-125K232 is a high-capacity, liquid-cooled commercial and industrial (C& I) energy storage system that combines advanced lithium iron phosphate (LiFePO₄) battery technology ...

Many people in France think that nuclear power emits CO₂, whereas the reality is quite different. To understand CO₂ emissions, we must differentiate between the emissions of ...

A guide to setting up your electricity in France, with EDF or another provider. Information about the offers and tariffs for electricity in 2025 and how ...

This map shows the distribution of wind and solar photovoltaic power generation facilities in mainland France, aggregated by French department. The values displayed contain a partial ...

Europe's largest floating solar park, "Les Ilots Blandin", was officially inaugurated today by Q ENERGY and Velto Renewables in the municipality of Perthes in the Haute-Marne ...

The modern design and spacious interior of this electric car appeal to families. French production guarantees maximum eligibility for subsidies, further improving its value for money. Renault 5 ...

06/08/2025 - European Commission greenlights EUR11bn CfD scheme for French offshore wind 05/08/2025 - French subsidies for renewable power will increase by 24% in 2026 to EUR7.7bn ...

The France energy market report provides expert analysis of the energy market situation in France. The report includes energy updated data and graphs around all the energy sectors in ...

French new energy station 125kWh
