

Do EMS stations need a specific space?

Carve out specific spaces for specific uses Of course any EMS station needs adequate sleeping quarters, bathroom facilities and locker/changing rooms for both men and women - but consider what other activities happen at your station that you may not currently have a specific place for.

What makes a good EMS Station?

By Rachel Zoch,EMS1 BrandFocus Staff An EMS station needs to provide the comforts of home as well as the tools for work,from restful sleeping quarters to office space and equipment storage. Energy efficiency and safety should also be top of mind,whether you are making improvements to your current station or building a new facility.

What should a EMS Station include?

Another special space your station should include is a place for providers to exercise. Consider the specific workouts and equipment your providers are most likely to need and use. Where a firefighter might need to lift heavy weights,an EMS provider may be better served by a rowing machine,says Rodriguez.

The practices recommended by USP can form the backbone of any EMS medication storage plan, but they'll have to be tailored to each system. Parking in climate-controlled garages or taking ...
