

Who are German solar pioneers?

As German solar pioneers, we are absolute experts in the construction of rooftop modules. But we thought ahead early on and started to take the possibilities of our technology to new levels. Today you will find modules for the classic rooftop system, as well as solar roof tiles and unusual products for solar construction.

How can we gain solar power for everyone?

Let's also gain solar power for everyone! Simple and sustainable energy generation from the sun. With technology for our green future. We do more than just exceptional solar products. The rooftop system is a real classic for generating solar power. As German solar pioneers, we are absolute experts in the construction of rooftop modules.

Why should you choose German Offgrid power?

With German Offgrid Power, you benefit from the solar power plant regardless of infrastructural restrictions. And bring the power exactly where it is needed. Above all, one of the decisive factors for our product portfolio is: highest standards.

How many photovoltaics are there in Germany?

As of the end of 2024, the total installed capacity of photovoltaics in Germany has exceeded 100GW, an increase of 21% compared to 2023. Among them, distributed roof systems account for up to 85%, and small-scale solutions such as balcony photovoltaics are rapidly becoming popular.

How much power does a solar panel have?

The total power of the solar panel can reach 750W. The power is never a false scale. 3. The peak output power of the inverter is 600W. Meet household needs. 4. The inverter (built-in MPPT) is equipped with WiFi function, which can detect system data in real time 5. No air pollution, no sewage discharge. No combustion process, no fuel. 6.

Who is solarinvert GmbH?

SolarInvert GmbH is a holding company with a long history. The production foundation of inverters was laid as early as 1995 at ZSW (Solar and Hydrogen Research Center) in Stuttgart.

Munich will witness the launch of a unique combination consisting of the 1-phase 2-in-1 Sunny Boy Smart Energy inverter and the SMA Home ...

Find out how Germany is investing in large solar projects to help achieve its 2030 target of generating 80% of its electricity from renewable sources.

Without a utility grid connection, you'll need the best off-grid inverter to ensure a steady supply of electricity
