

What is frequency regulation power optimization?

The frequency regulation power optimization framework for multiple resources is proposed. The cost, revenue, and performance indicators of hybrid energy storage during the regulation process are analyzed. The comprehensive efficiency evaluation system of energy storage by evaluating and weighing methods is established.

Is energy storage a new regulatory resource?

As a new type of flexible regulatory resource with a bidirectional regulation function [3,4], energy storage (ES) has attracted more attention in participation in automatic generation control (AGC). It also has become essential to the future frequency regulation auxiliary service market.

Which energy storage technology provides FR in power system with high penetration?

The fast responsive energy storage technologies, i.e., battery energy storage, supercapacitor storage technology, flywheel energy storage, and superconducting magnetic energy storage are recognized as viable sources to provide FR in power system with high penetration of RES.

Do energy storage stations improve frequency stability?

With the rapid expansion of new energy, there is an urgent need to enhance the frequency stability of the power system. The energy storage (ES) stations make it possible effectively. However, the frequency regulation (FR) demand distribution ignores the influence caused by various resources with different characteristics in traditional strategies.

What is the model of SCES energy storage?

The model of SCES energy storage proposed and used in Refs. [95,96], is given in Fig. 11. The model employs two phase compensation blocks with time constants T_1, T_2, T_3, T_4 , a gain block K_{sc} , and time constant of SCES (T_{sc}).

How can FR Power optimization improve frequency stability?

In order to improve the frequency stability, minimize FR control costs, and rationalize the revenue allocation between FR resources, a double-module FR power optimization strategy is proposed considering the cost, performance, and revenue of TPU and ES.
