

How long is the warranty period for telecom energy storage containers

How long does a Bess warranty last?

Installing BESSs involves technical and operational risks for utility operators and investors. To mitigate risks, BESS manufacturers may offer warranties for 10 years or more based on performance estimates. However, purchasers of BESSs must choose the level of warranty coverage and pay a premium for this coverage.

What are the different types of storage warranty?

In the energy storage sector, there are two main types of warranties: a product warranty, which is a guarantee against defects, and a performance warranty. In this context, we do not focus on the product warranty as much.

Is a standard two-year warranty sufficient?

A standard warranty of two years for both performance and product is what most manufacturers offer. However, most projects that are financed require a longer warranty.

What types of energy storage solutions does Emtel offer?

Emtel offers a range of battery and container solutions in 10ft, 20ft, and 40ft configurations, catering to diverse energy storage requirements. These containers house our advanced energy storage systems, providing a scalable and adaptable solution for various applications.

How long does a lithium ion battery last in a satellite?

Lithium-ion batteries have proven to last 10 years or more in satellites, so it's not unrealistic to assume that lithium-ion batteries could last for 10 years or more in a properly designed and operated BESS.
