

How many inches is suitable for outdoor power screen

How big should a projector screen be for outdoor viewing?

The way to measure this is that for every 12 inches of screen width you want to be sitting 10 inches from the screen. By figuring out where you'll be sitting and the maximum space your screen can fit you'll be able to calculate the recommended projector screen size for outdoor viewing.

What size movie screen do I Need?

We always recommend getting the biggest movie screen your budget and space limitations would allow for. A 20 foot inflatable screen would be awesome but it isn't ideal for small outdoor spaces. Not to mention you'd need a significantly bright projector to pair with it.

What size HDTV should I get?

Because you'll mostly be watching movies on your projector screen, we'd recommend getting either a 16:9 HDTV or a Cinemascope screen. 16:9 is more likely the size you'd want to go with because most streaming services use this as their standard aspect ratio.

Do outdoor projection screens work well indoors?

Some people looking to create a stunning outdoor theater already have projectors and projection screens that work perfectly well indoors. They simply assume that same equipment will perform just as well outdoors, only to be sorely disappointed by an experience that's not even close to drive-in quality.

What direction should a projector screen be placed?

What direction should I place an outdoor projector screen? You should place your outdoor projector screen so it's facing either north or south to avoid as much sunlight as possible around sunset. Ideally you'd want to have the projection surface facing north so the sunlight will be even less direct because of the angle the sun sets.

What are the different types of outdoor projection screens?

Here are some common outdoor screen sizes and an approximation for how many audience members they can accommodate. When it comes to open air projection screens, you've got a few options: retractable, foldable, tripods, inflatable and screen paint. Each kind of screen is great for different types of outside situations.
