

How much does it cost to buy solar energy storage in Northern Cyprus

Why should you install solar panels in Cyprus?

The technological development within photovoltaic systems goes fast. The solar panels are becoming ever more effective and the cost is decreasing. Installing solar panels in Cyprus is becoming an increasingly profitable option for private households. Save EUR with solar panels in Cyprus [Read about the Net Metering scheme](#) [Page contents](#)

Can I use photovoltaic systems to harvest solar energy in Cyprus?

Using photovoltaic systems to harvest the solar energy in Cyprus is a no-brainer. Learn how you can save EUR with solar panels via the Net Metering scheme [Using photovoltaic systems to harvest the solar energy in Cyprus](#) is a no-brainer. Learn how you can save EUR with solar panels via the Net Metering scheme

Where can I find solar energy in Cyprus?

The solar energy and installation companies can be found in all of the major cities throughout the island, including Nicosia (the capital), Limassol, Larnaca, Famagusta and Paphos. In 2011, the Cypriot target of solar power including both photovoltaics and concentrated solar power was a combined 7% of electricity by 2020.

How long does a solar system last in Cyprus?

This means that your investment will be recovered after only 4 years!!! This is a really short time for any investment to pay for itself. After the initial four years, you can really enjoy the extra savings from your investment in a solar system here in Cyprus. This time frame is based on current electricity prices, but let's face it.

Is Cyprus a good place to use solar energy?

This makes Cyprus an excellent place to utilise solar energy to produce electricity just as it is already used to heat water at most households. While the daily hours of sunshine are not always plenty - particularly during winter - there are more than 300 days with sunshine in Cyprus.

How many kW can a solar system produce?

The capacity of the solar system can be maximum 3 kW, which will ensure you significant savings on your electricity bill. There is also no need to store the electricity locally, which is the really smart part about the Net Metering scheme.
