

Hungary can install 127 ultra-fast electric charging points and its first public hydrogen filling station for heavy-duty vehicles if the projects ...

Hungary opened its first hydrogen refuelling station last week. The station, operated by Linde G&#225;z Magyarorsz&#225;g Zrt., allows users to fill up with up to 4,000 kilograms of ...

Hy-Hybrid Energy- Scotland (Glasgow) based fuel cell services provider welcomes the inauguration of Hungary's first hydrogen refuelling station. Inaugurated by Linde, the ...

Powering a sustainable energy future Gastech, now in it's 53rd year, is the world's largest exhibition and conference for natural gas, LNG, hydrogen, climate technologies, and AI in energy.

A Hungarian company operating refineries, petrochemical sites, and service stations across Central and Eastern Europe has unveiled plans to start commercial operations of a 10-MW ...

The potential future use of hydrogen as transportation fuel should be assessed from supply chain point. However, the main challenge to motivate hydrogen supply chain (HSC) ...

As we have indicated before, the use of hydrogen could open a new era in the history of the Hungarian energy and hydrogen economy. In May last year, Hungary's first ...

International Journal of Hydrogen Energy, 2008 Mixed integer linear programming Multiobjective optimization Safety a b s t r a c t This study presents a method for the design of a hydrogen ...

In the long term, the Strategy places "green" hydrogen a focus, but produced from renewable sources, primarily solar energy in addition to hydrogen based on electricity on a nuclear basis, ...

Today, in the industrial segment of Hungary, hydrogen technologies are present primarily on the user, consumer side, however, there is potential in Hungarian companies for the development ...

The first hydrogen filling station in Hungary, operated by Linde Gas Hungary Plc., has opened in Budapest, where 4,000 kilograms of hydrogen can be filled up after prior ...

Hungary opened its first hydrogen refuelling station last week. The station, operated by Linde G&#225;z Magyarorsz&#225;g Zrt., allows users to fill up with ...

4 days ago; A new 35-MW green hydrogen electrolyzer from the Accelera branch of Cummins will run on hydropower at a Linde facility in New York.

The tender for the realisation of the combined cycle gas turbine power plant (CCGT) at the M&#225;tra power plant has been successfully completed, the agreement with the ...

Energy container: continuous, 100 % renewable power supply on remote (off-grid) area in a national park. 10 kWp photovoltaic system with battery energy storage; supplemented with an ...

Hungary can install 127 ultra-fast electric charging points and its first public hydrogen filling station for heavy-duty vehicles if the projects receive EU funding.
