

Is the outdoor power supply in plateau good

Are outdoor power strips weather resistant?

Outdoor power strips come in a variety of sizes, from small three-outlet models up to large 10-outlet beasts. Unlike indoor models, these rugged, weather-resistant power strips can endure extreme temperatures and even downpours. Understanding what weather conditions an outdoor power strip is rated to handle is key to purchasing the right one.

Should you buy an outdoor power strip?

If those two sockets in your outdoor outlet aren't enough to fulfill your outdoor power needs, then you'll want to invest in a good outdoor power strip. These handy appliances can multiply a single socket into six or even 10, allowing you to power multiple strings of lights or various outdoor appliances simultaneously.

Can a PDU be used as a temporary power system?

But without a reliable and safe power distribution system, your electric supply is always vulnerable to interruptions and hazards. In order to safely distribute power from the generator to the consumer devices, a PDU can be used as a Temporary Power System.

What is a portable power distribution unit?

It has been designed according to the North American needs of temporary power distribution systems, especially outdoor atmospheric conditions and safety measures. Portable Power Distribution Units are sized based on current draw and will come with the appropriate circuit protection devices.

Do you need a temporary power distributor?

As electric supply lines are not available everywhere, you can always use an electric generator along with a temporary power distributor to build a safe power system for uninterrupted power supply. Apart from using these PDUs at temporary locations, they are also used in events where electric supply is easily accessible.

How much does a power distribution unit cost?

Furthermore, the design needs to be economical, there are so many variations and specifications to follow that consumers may choose the wrong set-up for their needs. A typical domestic-level Power Distribution Unit costs around \$600, whereas the cost of a commercial scale PDU can cost in upwards of \$2000.
