

Lithium battery tray

Do I need a battery tray for ionic lithium batteries?

Yes, you do need a good tray that fits your ionic lithium batteries. Custom built battery trays for Ionic Lithium Batteries are available, featuring rubber pads, mounting screws, and a battery strap. Darius M. reports that it works great and is easy to install.

What is a battery tray?

Luckily, there's a specialized product that solves this problem, and does it well: a battery tray. It's a device that can hold batteries in place, even large battery packs. Use our Ionic battery trays for a single battery, or several batteries in parallel.

Why do you need a battery tray?

But it's still important to protect your investment with a battery tray made specifically for lithium batteries. Keeps batteries from sliding or flipping out of place. Lets you hold several batteries together. Prevents damage to batteries and surrounding objects. Mounting screws keep the setup fastened to your UTV, boat, or other application.

How much does a battery tray cost?

On average, you can expect to pay between \$10 to \$50 or more for a battery tray. Higher-quality or specialized battery trays may be at the higher end of the price range. When selecting a battery tray, make sure it is compatible with your car's battery size and type, and that it meets your specific needs. Buy a new battery box from JEGS.

What is the difference between Battery trays and battery boxes?

Battery boxes are closed. This makes reaching your battery terminals difficult. Battery trays are open-sided, allowing for easy access and installation. Battery trays take up less space. Our battery trays are made of durable metal, not plastic like most battery boxes. You only have to lift your battery about an inch to place it in a battery tray.

Are ionic Battery trays safe?

Besides ensuring your battery would be the ultimate winner in a game of freeze tag, battery trays also keep battery acid from leaking on surfaces or gear. However, that problem doesn't apply to our Ionic lithium batteries! They don't contain any acid or toxic chemicals that have the potential to leak.

Our battery trays are made from heavy-duty aluminum. The bottoms are lined with a 3mm thick rubber protection pad to safely secure your battery while reducing vibrations.
