

Mozambique container power house

Does Mozambique have hydropower?

Including hydropower, renewables currently make up 70% of all energy produced in Mozambique. Hydropower has traditionally been the largest contributor to Mozambique's power production. The country has one of the largest potentials in Africa, largely thanks to the mighty Zambezi River, which boasts a projected production capacity of 20 GW.

What does Mozambique's New E-house package include?

It will also include a Liquefied Petroleum Gas (LPG) facility that will produce 30,000 tons per year, meeting 75% of Mozambique's cooking gas demand and light oil for export. The substation E-house package measures 45m by 22m and includes MV and LV switchgear, a battery room, a local equipment room and an HVAC system.

What is Mozambique's energy potential?

The country has one of the largest potentials in Africa, largely thanks to the mighty Zambezi River, which boasts a projected production capacity of 20 GW. More than half of this potential is in Mozambique. Existing power plants such as Hidroelétrica de Cahora Bassa (HCB) contribute significantly to the country's energy production.

Does Mozambique use natural gas as a transitional fuel?

GAS IN THE ENERGY TRANSITION: With the largest natural gas reserves in sub-Saharan Africa, Mozambique is also focused on utilising clean gas as a transitional fuel for its power generation sector. A giant 2-GW combined-cycle gas turbine power plant is being planned in Beluluane, near Maputo.

Can Mozambique produce 2 GW?

Alongside wind and solar, Mozambique also has large biomass potential, with estimates pointing to the possible production of 2 GW. **GAS IN THE ENERGY TRANSITION:** With the largest natural gas reserves in sub-Saharan Africa, Mozambique is also focused on utilising clean gas as a transitional fuel for its power generation sector.

Who oversees Mozambique's off-grid projects?

Most of Mozambique's off-grid projects are being overseen by national promoter and developer FUNAE. In March 2024, the institution announced it would invest in 19 new mini-grid construction projects in remote areas to add to its portfolio of generation assets.
