

New investment projects in energy storage in Serbia

How many MW of battery storage will be developed in Serbia?

Up to 200 MW of battery storage will be developed across the sites. Image: Ministry of Mining and Energy, Tanjug Plans for 1 GW of new solar in Serbia are set to go ahead after the signing of an implementation agreement.

How much money will be spent on infrastructure projects in Serbia?

A large portion of the funds are going to infrastructure projects, including road, rail, air, and water upgrades. In August 2023, Serbian President Vucic announced a new investment cycle worth EUR12 billion, aimed at preparing the Serbian capital Belgrade to host the 2027 World Expo.

How many solar plants will be built in Serbia?

The agreement commits six new solar plants to be built across Serbia. The Serbian government approved the proposed sites in September. The largest in the deal is a 460 MW facility in the territory of Negotin and Zajecar, followed by a 302 MW plant in Bosnjace.

Is solar a good option for Serbia?

A statement published on the Serbian government's website says solar is the most optimal solution to quickly reach large capacities from green sources, without burdening and endangering the stability of the transmission network. Serbia currently gets more than 60% of its electricity from fossil fuels.

Who signed a new power contract in Serbia?

The signing of the contract, by Serbia's Minister of Mining and Energy Dubravka Dedovic Handanovic, alongside representatives of state-owned power utility company Elektroprivreda Srbije (EPS) and a consortium of Hyundai Engineering and UGT Renewables, took place earlier this week.

Fortis Energy acquires a major solar project with an integrated Battery Energy Storage System (BESS) in Serbia. Learn more about this groundbreaking renewable energy ...

It envisions an energy sector that insists on energy efficiency and RES use, provides a secure supply of all energy sources, provides affordable energy for the economy and population, ...

Investments in battery energy storage systems (BESS) is ramping up around the world and Serbia is now making its first steps.

UGT Renewables is working with Serbia's EPS to provide a series of self-balanced utility-scale solar projects, including battery storage, to every corner of Serbia.

New investment projects in energy storage in Serbia

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on the increasing integration of energy storage ...

The plan is expected to be drafted within eight months, with funding provided by EPS. Finance Minister Sinisa Mali stated that construction of the self-balancing solar power ...

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on the ...

Serbia plans to build solar power plants, wind farms, and pumped-storage hydropower plants, but also gas-fired power plants, energy storage batteries, and hydrogen facilities, in order to ...

We aim to focus initially on several countries in the region, including Serbia, to support workers affected by the green transition, projects in low-carbon ...

Serbia's state-controlled electricity producer Elektroprivreda Srbije (EPS) plans to put 3.5 billion euro (\$3.8 billion) into green energy projects by ...

The project reflects the company's vision to become a key player in Southeast Europe's energy system. By investing in integrated solar and storage solutions, Fortis aims to ...

Serbia offers significant investment potential for renewable energy integration and battery storage capacities to balance new renewable energy capacity on the grid.

Investing in renewable energy integration and battery storage in Serbia presents opportunities to create a more sustainable and reliable energy system. It can contribute to the ...

The spring of 2023 brought significant regulatory changes in the renewable energy sector in Serbia. The Law on the Use of Renewable Energy ...

An implementation agreement is in place between Serbia's Ministry of Mining and Energy, utility company Elektroprivreda Srbije (EPS) and a consortium of Hyundai Engineering ...

Serbia offers significant investment potential for renewable energy integration and battery storage capacities to balance new renewable energy capacity on the grid. Here are key points ...
