

Nighttime energy storage and daytime electricity rate plan

Should I get a free nights or weekends electricity plan?

Higher daytime and weekday rates can drive up your bill if you don't monitor your electricity carefully. Free nights plans aren't ideal for those who work from home. In these scenarios, you benefit more from a basic fixed-rate electricity plan, or a free days electricity plan. Before signing up for free nights and weekends electricity:

What is a nighttime Saver rate?

With lower rates at night, when most charge their EVs, this is our recommended rate if you have a Plug-in Electric vehicle. What is the Nighttime Savers Rate? If you can be flexible about what time of day you use electricity, this three-tiered rate could help you save money on your bill.

What is Chariot Energy free nights?

Chariot Energy Free Nights: Chariot's free nights plan gives you free power from 11pm to 6am every day. That lets you sleep at the temperature you want, without worrying about your AC or heating costs. Here's our Chariot Energy Free Nights review.

What is the best free weekends electricity plan in Texas?

Champion Energy Free Weekends: Champion Energy Free Weekends plan is the best deal on the market. It's priced comparably to their regular fixed rate plans and less than other free electricity plans on the market. This is the best free weekends electricity plan in Texas. Here's our Champion Energy Free Weekends review.

What are the different free electricity plans?

There are a lot of different free electricity plans you can pick from. We recommend what we call fair and balanced free electricity plans. On both of these plans, if you use power like an average consumer, you'll get a low average rate similar to their fixed rate plans. And if you can shift some of your usage, you'll get an even better price.

What is energy storage & why is it important?

Energy storage through batteries primarily acts as a source of backup power when there are power outages. It also saves you from bearing time-of-use electricity rates which can be quite high during peak hours.
