

What is a lithium-ion battery recycling plant?

Image: Northvolt. A lithium-ion battery recycling plant is under construction in Norway, focusing initially on electric vehicle (EV) batteries, but the CEO of the company behind it has said that it will also be capable of processing batteries from stationary energy storage systems (ESS).

Are batteries a potential green industry in Norway?

McKinsey & Co. has identified batteries as one of Norway's principal potential green industries in the future. According to the consultancy, a rapid and broad strengthening of all parts of the battery value chain is needed to satisfy the global battery shortage.

Does Norway have a battery market?

Today Norway has not one, but two huge battery markets. "There are two market drivers for batteries: EVs and stationary energy storage. Energy storage is coming on strong now. It's the key to turning intermittent wind and solar into a stable energy source," explains Pål Runde, Head of Battery Norway.

Who is supplying end-of-life lithium-ion batteries?

Eco Stor, an Oslo-headquartered portfolio company of Norwegian utility company Agder Energi, will provide the joint venture with end-of-life lithium-ion batteries. Morrow Batteries, a battery manufacturer, will also supply lithium-ion battery manufacturing scrap from its planned facilities in Norway.

Why should we invest in EV battery recycling in Norway?

Our BESS holds immense potential for contributing to Norway's burgeoning clean energy landscape. Upon installation at the EV battery recycling facility, Hydrovolt, it will play a pivotal role in optimizing energy utilization and unlocking new revenue streams.

Is Norway a good place to buy EV batteries?

An early adopter of electric transport, Norway continues to capture EV battery headlines. Electric cars now account for 79 per cent of new cars sold in Norway, and the MS Medstraum was recently launched as the world's first electric fast ferry. In a global report on lithium-ion batteries, Norway ranked first in sustainability.

Sustainability may be Norway's secret weapon in the competition with China, which still dominates lithium-ion battery production with its 125 ...

Elinor Batteries has signed an MoU with SINTEF Research Group to open a sustainable, giga-scale factory in mid-Norway, and HREINN will manufacture 2.5 to 5 million ...

Designing Lithium-ion Batteries for Spinning Reserve and Safety The concept of using lithium-ion energy

storage solutions (ESS) in both all-electric and hybrid power systems ...

Norwegian firms Morrow Batteries and Eldrift have announced a non-binding offtake agreement for 1.5GWh of Morrow's lithium iron phosphate ...

Li-Cycle will have the right to acquire 100% of the black mass output. Energy storage developer ECO STOR will supply the plant with end-of-life lithium-ion batteries, and ...

Nordic Batteries announces it is entering into a strategic partnership with Morrow Batteries and Eldrift to develop complete battery packs for mobile and ...

As the world increasingly moves towards renewable energy sources, understanding how battery storage works in distributed energy systems has become crucial. This guide aims ...

The building of the Giga Arctic lithium-ion manufacturing facility in Norway. Cells built there will not be competitive with those from the US ...

Much of the price decrease is due to the falling costs of lithium-ion batteries; from 2010 to 2016 battery costs for electric vehicles (similar to the technology used for storage) fell ...

Last week marked a significant milestone for our company as we proudly received our inaugural Battery Energy Storage System (BESS) shipment in Norway, a nation known for its ...

Norway's first lithium-ion (Li-ion) battery factory has taken a key stride toward construction with a Nkr142m (\$16.4) grant being given to developer Freyr by the Nordic ...

A render of Morrow Batteries' first gigafactory, from when it raised EUR100 million from Siemens Financial Services and ABB in May 2022. Image: Morrow Batteries. The COO ...

paves the way for global energy storage adoption As 2020 came to a close, AES began operating the Alamos Battery Energy Storage System (BESS) in Long Beach, California, making history ...

The company formed a joint venture with ECO STOR, a second-life energy storage development business focused on converting used lithium-ion batteries into energy storage systems and Li ...

The company's flagship battery gigafactory in Sweden, Northvolt Ett. Image: Northvolt. European battery company Northvolt has filed for Chapter 11 "reorganisation" ...

A lithium-ion battery recycling plant is under construction in Norway, focusing initially on electric vehicle (EV) batteries, but the CEO of the company behind it has said that it will ...

Norway distributed energy storage lithium battery plant
