

Outdoor Energy Storage Kress

Does Kress use a battery?

Today, the Kress brand unveils its new line of professional outdoor power equipment which is powered by its exclusive cordless battery technology-- specifically designed for commercial lawn-care professionals -- that will forever eliminate the need for petrol equipment. The Kress battery technology explained

What is a Kress 8-minute battery platform?

The new Kress 8-minute Cybersystem battery platform will power a full line of Kress professional outdoor equipment that includes commercial-grade backpack and handheld blowers, grass trimmers, edgers, chainsaws and hedge trimmers, as well as heavy-duty walk-behind commercial mowers.

Why should you buy a Kress cyberpack battery?

The added power output allows Kress outdoor power equipment to meet or exceed the same performance as comparable commercial gas-powered machines but with less noise and zero harmful emissions. In addition, the Kress Cyberpack battery can be re-charged thousands of times - up to 10 times more than standard lithium-ion batteries.

Is Kress leading the transition from gas-powered commercial lawn equipment?

CHARLOTTE, N.C., Sept. 14, 2022 /PRNewswire/-- Kress is leading the transition from gas-powered commercial lawn equipment for professional operations with the introduction of the industry's first true game-changing innovation in battery-powered equipment.

Does Positec sell Kress batteries?

Positec Group has acquired the Kress brand in North America and positioned Kress to become a powerhouse in producing professional-grade cordless equipment valued by professional landscapers and facilities managers in the industrial channel. Many benefits of Kress's batteries have never before been available in OPE in North America.

How fast does a Kress battery charge?

"The revolutionary, new Kress battery charges to 80 percent capacity in only five minutes, provides 10 times more re-charges than current lithium-ion batteries and produces the power and performance that meets or exceeds that of comparable combustion gas-engines.
