

• Energi acquires a majority stake in a large-scale energy storage project • Energi has acquired a majority stake in the Isokangas energy storage project near Oulu. The 50 ...

The storage site is located south of the Troll field. The Eos confirmation well, drilled in March 2020, will be used for injection and storage of CO₂. The Northern Lights project represents a ...

In April 2020, the Norwegian Ministry of Energy granted Norsk Hydro a concession to develop the Illvatn pumped storage power plant. An application for a plan change is being ...

The Elektra Energy Storage Project, Sweden's largest battery storage project, is now fully operational. Located in Landskrona, southern Sweden, the project will provide ancillary ...

The Northern Lights project comprises transportation, receipt and permanent storage of CO₂ in a reservoir in the northern North Sea. Phase 1 includes capacity to ...

Why This Mega-Project Matters (and Why You Should Care) a mountain range near Oslo where three peaks aren't just scenic viewpoints, but giant energy storage power ...

Whether for EVs or energy storage, Norway has always had ideal conditions for battery growth: renewable energy in the form of hydropower, strong government financial ...

• Energi has acquired a majority stake in the Isokangas energy storage project near Oulu. The 50 megawatt/1hour energy storage facility to be completed in 2026 is a significant ...

We are a proud contributor of sustainable and smart energy supply for northern Senja. By installing local energy storage solutions that will function as energy buffers, we will, together ...

Besides traditional hydroelectric storage, Norway is exploring and investing in other energy storage technologies and facilities to enhance grid stability, integrate more ...

Oslo, Norway | AFP Norway on Tuesday launched a flagship carbon capture and storage (CCS) project, a technology seen as crucial to curbing climate change but struggling ...

Capacity Targets The Norwegian government prioritizes clean hydrogen produced through renewable energy (electrolysis) or carbon capture and storage (CCS) for natural gas ...

Outdoor energy storage project in Norway

Green hydrogen and wind power: Norway is exploring the integration of wind energy with green hydrogen production, particularly in offshore wind projects. This could provide a solution for ...

3 days ago; Subsea energy storage concepts are moving closer to reality as Subsea7 and FLASC prepare to deploy a pilot project in the Netherlands.

How Hydro Energy Norway Powers the Country Hydropower plants in Norway operate on a simple principle: converting the potential energy of water stored at height into ...

Why Oslo's Energy Storage Market Demands Attention Norway's capital, Oslo, has emerged as a global leader in renewable energy adoption. With ambitious goals to reduce carbon emissions ...
