

Outdoor power equipment installation

What is the National Electrical Code (NEC) for outdoor wiring?

The National Electrical Code (NEC) includes many specific requirements for installation of outdoor circuits and equipment. With outdoor wiring, the primary safety concerns involve shielding against moisture and corrosion, preventing physical damage, and managing issues related to underground burial.

Why should you bring power outside?

All the power you need. Right where you need it. Bring safe, permanent power outside with outdoor ground boxes and charging stations. Promote longer stays, better productivity and more positive experiences at higher education campuses, offices, parks, patios and more.

How do I get power from inside my house?

Here are some methods to get power from inside your home to an outside appliance or receptacle not fastened to the house (e.g., pole mounted lantern), or to a detached building (e.g., to a shed, detached garage). Decide whether you want to install an aerial or underground wire and then get the proper permits.

What is Xtreme Outdoor Power Equipment's torque?

Torque refers to the amount of rotational force applied to tighten fasteners, such as bolts or screws, in the Xtreme Outdoor Power Equipment. Set a torque wrench to the Xtreme Outdoor Power Equipment-recommended torque value. Be careful not to exceed the specified torque, as it can lead to damage or breakage of components.

What are the rules for outdoor receptacle outlets?

Many of the rules applying to outdoor receptacle outlets are aimed at reducing the likelihood of shock, which is a notable risk anytime a user is in direct contact with the earth. 1 The principal rules for outdoor receptacles include: GFCI (ground-fault circuit-interrupter) protection is required for all outdoor receptacles.

What are the requirements for aerial installation?

Aerial installations should only be done for short lateral runs, and where they may be installed so that traffic (vehicle or pedestrian) below will not create a hazard by contact. Additional clearance requirements must be observed when passing over driveways, spas, pools, roofs or near windows and doors.
