

Price quote for new solar energy systems in Belgium

Can you install solar panels on a roof in Belgium?

Installing solar panels on your roof is a (very) cost-effective operation. In Belgium, there are a number of subsidies to help cover the cost of installing solar panels. You can also choose the model of the self-consumption of energy produced by panels, which is also very advantageous.

How to reduce solar power installation costs in Belgium?

Many countries and states offer incentives and tax credits to encourage solar adoption. These programs can significantly reduce solar power installation costs in Belgium, although they often require compliance with specific standards and guidelines.

Are solar panels self-consumption a good idea in Belgium?

In Belgium, many people are opting for self-consumption for their solar panels. Here's what it means and what the advantages are: You use the electricity generated by your panels directly. If you produce too much, you can sell the surplus to the electricity grid. The upside of self-consumption :

Can solar panels be installed in Brussels?

In Brussels, additional regulations are added: the solar panels can not be visible from a public space, and they do not protrude more than 30cm off the roof. For the installation of solar panels on the ground, on a protected building or in other regulated cases, you will have to contact your municipality.

How do solar panels work in Belgium?

Energy transformation Photovoltaic panels convert solar energy into electricity. Self-consumption and resale : In Belgium, you can consume the electricity you produce and sell the surplus. Service life : Recent models of solar panels last between 25 and 30 years. Subsidies : These facilities benefit from substantial public funding.

Why do solar panels cost so much?

Number of panels and capacity: the total capacity of the solar panel system has a big impact on the price. Larger systems with more panels cost more, but the price per watt can be lower due to economies of scale. The number of solar panels you need depends on your energy consumption and the power per panel.
