

Production inverter scaffolding kit

What is a Metaltech motorized climb-n-Go for Baker scaffolding?

The Metaltech Motorized Climb-N-Go for Baker Scaffolding is designed to increase worker efficiency, eliminating the need to get off the scaffold to move it. Equipped with a powerful electric motor, this unit is propelled by the energy of an 18V-21V battery from one of the six largest brands in the industry.

How does a scaffolding motor work?

Equipped with a powerful electric motor, this unit is propelled by the energy of an 18V-21V battery from one of the six largest brands in the industry. Its wheels are installed on the bottom of the scaffolding, and the joystick control on the guardrail or directly on a rung.

What types of scaffolds can the electric motor be installed on?

The electric motor can be installed on all Metaltech Baker type scaffolds. It can be powered by various brands such as DEWALT®, MAKITA®, MILWAUKEE®, STANLEY®, and PORTER CABLE®. The motor offers a battery life of 4,500 feet on a single charge and is quick and easy to install.

What are the advantages of electric powered scaffolding?

The platform comes complete with guardrails which provides workers with a safe working area, especially compared to ladders. The electric powered scaffold provides many advantages over a engine driven scissor lift. It is environmentally friendly as it produces zero emissions. This feature also allows it to be used indoors.

Why should you choose a stepladder vs a scaffold?

Manpower productivity is enhanced over stepladders and standard scaffold in many cases by reducing the wasted moving devices and continual climbing up and down. The platform comes complete with guardrails which provides workers with a safe working area, especially compared to ladders.

Who is Layher scaffolding?

With over 75 years of experience manufacturing scaffolding, we certainly understand what our clients are looking for, and we continue to rise to that challenge and provide the highest quality scaffolding. From large jobs such as upgrading a cooling tower to maintenance work on a power station, Layher has been the scaffolding of choice.
