

Real-time prices for solar panels

How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

How much does solar installation cost?

On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system. What else affects solar installation costs?

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's "cost per watt" is a little like the "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes.

Does commercial solar cost a lot?

The solar price for commercial projects varies based on system size, location, energy needs, and available incentives. Unlike residential solar, commercial solar pricing benefits from economies of scale, resulting in a lower levelized cost of electricity (LCOE).

How do I calculate the cost of solar?

First, you can use an online solar cost calculator, like this one powered by solar.com. Simply punch in your address and your average monthly electricity bill, and the calculator will give you a side-by-side comparison of the cost of solar versus paying for utility electricity.

How much does it cost to clean solar panels?

Solar panels require very little upkeep. If you're able to clean the solar panels yourself, the only maintenance cost will be the water used to hose them down. If you hire a professional to clean your solar panels, it will cost around \$100 to \$350, on average.
