

Electrica and Renovatio Trading obtained the first EU grants for battery storage in Romania, alongside a solar panel factory project.

The firm added that the deal strengthens Kraftfeld's strategy of optimizing its project pipeline while accelerating the energy transition in the EU region. MET Group's ...

The Ministry of Energy has fulfilled two more milestones in the PNRR, for storage capacities in batteries and the production of photovoltaic ...

Romania's Ministry of Energy has reached two additional milestones under the National Recovery and Resilience Plan (PNRR) related to battery storage capacities and ...

Rezolv Energy and Monsson received all approvals from local authorities for the construction of Dama Solar. The photovoltaic facility in western Romania will likely become the ...

In its first, the Romanian government has allocated EU funds for two major battery energy storage projects via the National Recovery and Resilience Plan. A utility-scale solar ...

The energy storage system is primarily used to participate in grid frequency regulation and enhance grid stability. It also stores excess power generated by photovoltaics, providing power ...

Rezolv Energy and Monsson have received final approvals to commence construction of Dama Solar, a photovoltaic facility in Pilu and Graniceri communes, Arad ...

Romania expects its overall energy storage to amount to at least 2.5 GW in operating power at the end of 2025, and to expand to as much as 5 ...

The Israeli company Econergy, one of the most important investors in renewables in Romania, announced that it has officially connected a new 87 MW photovoltaic park located ...

The renewable energy sector in Romania is at an exciting crossroads, with the country looking to address both domestic energy demand and international ...

The Romanian Ministry of Energy has launched a grant program for battery energy storage systems developed in conjunction with existing renewable energy facilities - wind, ...

Romania Energy Storage Photovoltaic Project

This diverse portfolio of projects showcases the scalability, adaptability, and potential of solar energy in meeting Romania's energy needs. The cumulative installed capacity represents a ...

The construction of a EUR 1 billion solar power plant with storage is due to begin in the summer in Romania's Arad province, Agerpres reported. The project, for which Rezolv ...

The storage unit is charged with energy produced by an operational 50 MW wind farm and a 35 MW PV project under construction, named Galbiori 2, which is set to be grid ...

On 8 February, the Ministry of Energy of Romania announced the re-launch of its tender for battery energy storage projects and investments in the manufacturing sector for the ...
