

Romanian energy storage tank prices

How much gas is in storage in Romania?

In Romania, the amount of gas in storage has fallen to 63% in just one and a half months, with more than a third of the gas in storage being consumed, a steeper fall than the European average, according to Gas Infrastructure Europe. On January 8, 2025, the filling rate of storage facilities in Romania was 61.74%.

Will Romania's natural gas storage facilities reach 80% capacity?

BUCHAREST, Oct 3 (Reuters) - Romanian natural gas storage facilities have been filled above a targeted 80% capacity and could reach 90% by Nov. 1, deputy Energy Minister Dan Dragan said on Monday. Unlike other countries in the region, Romania relies less on Russian gas.

How will high energy prices affect Romania?

Regional implications Romania is at risk of maintaining its top position in terms of high energy prices, which could affect the competitiveness of industry and the population's purchasing power.

Does Romania need a greener energy mix?

Although Romania benefits from significant renewable resources, the transition to a greener energy mix remains incomplete. Dependence on natural gas and the difficulties of integrating renewable generation into the national grid remain challenges.

Why did gas prices rise in Romania?

Then there was market volatility, so that the rise in prices on the Dutch TTF exchange, the benchmark for Europe, was also felt on the Romanian market, where gas was traded at the equivalent of EUR51/MWh at the end of the year.

What has Romania done well in recent years?

"What Romania has done well in recent years is the investment in the Iasi-Ungheni gas pipeline, which has a transmission capacity of over 6 million cubic meters, which fully covers the natural gas consumption between the Prut and the Dniester," Sebastian Burduja also mentioned. Medium-term implications
