

Where can I find the latest science news on Solar System?

All the latest science news on solar system from Phys.org. Find the latest news, advancements, and breakthroughs.

Will a new astronomer find millions of new Solar System objects?

June 3, 2025 -- Astronomers have revealed new research showing that millions of new solar system objects are likely to be detected by a brand-new facility, which is expected to come online later this ... June 3, 2025 -- Scientists have identified a new source of energetic particles near the Sun.

Is there a new solar system in the Milky Way?

A new solar system has been found in the Milky Way. All 6 planets are perfectly in-sync, astronomers say. November 30, 2023 /3:17 PM EST /CBS/AP Astronomers have discovered a rare in-sync solar system with six planets moving like a grand cosmic orchestra, untouched by outside forces since their birth billions of years ago.

Are all solar systems synchronized?

All solar systems, including our own, are thought to have started out like this one, according to the scientists. But it's estimated only 1 in 100 systems have retained that synchrony, and ours isn't one of them. Giant planets can throw things off-kilter.

What are some interesting facts about the Solar System?

An illustration of the solar system (not to scale), including the sun, inner rocky planets, asteroid belt, the outer gassy planets, and--beyond Neptune--the Kuiper belt and the Oort cloud. JACOPIN/BSIP SA/Alamy Stock Photo The outer reaches of our solar system hold some of its oldest and most mysterious secrets.

How many planets are in the Solar System?

Solar System Planets. Astronomy articles on the eight planets, plus the two dwarf planets, Pluto and Eris. Great pictures of everything in the solar system. Updated daily.

Find Solar System Latest News, Videos & Pictures on Solar System and see latest updates, news, information from NDTV . Explore more on Solar System.

A Strange Object Has Entered Our Solar System--and One Scientist Says It May Be an Alien Craft If it's not an asteroid or a comet, it might be something stranger.

Jupiter's Great Red Spot, the solar system's largest storm, wiggles like gelatin and contracts like a stress ball, new observations from Hubble ...

1 day ago· Scientist Watching to See If Mysterious Object Visiting Our Solar System Releases Any Probes "It could either visit us or release some mini-probes that arrive to Earth and ...

Astronomers have discovered a rare in-sync solar system with six planets moving like a grand cosmic orchestra, untouched by outside forces since their birth billions of years ago. The find,...

NASA's SPHEREx Captures Comet 3I/ATLAS, a Visitor From Beyond the Solar System Date: September 2, 2025 Source: NASA Summary: NASA's SPHEREx joined Webb ...

Astronomers have discovered a rare in-sync solar system with six planets moving like a grand cosmic orchestra, untouched by outside forces since their birth billions of years ...

5 days ago· Solar System Planets. Astronomy articles on the eight planets, plus the two dwarf planets, Pluto and Eris. Great pictures of everything in the solar system. Updated daily.

The Solar System consists of the Sun and all the objects that orbit it, including planets, moons, asteroids, comets, and meteoroids. It formed approximately 4.6 billion years ...

Recent observations by the James Webb Space Telescope (JWST) have revolutionized our understanding of these distant objects, revealing their compositions and ...

A meteorite discovered in north-west Africa in 2023 didn't come from a large asteroid or any of the known planets of the solar system - but it might have ...

A meteorite discovered in north-west Africa in 2023 didn't come from a large asteroid or any of the known planets of the solar system - but it might have formed on a planet that was destroyed...

Astronomers found hidden cosmic channels, like tunnels, connecting our solar system to distant stars, reshaping views of interstellar ...
