What is a shipping container home?

This home starts with the most basic of structures and build onto it's sturdy and efficient modular design. Shipping containers are also inexpensive and by using them for shelter, you'll be recycling materials as well as creating a home for yourself. Each shipping container is 40 foot long and has 320 square feet of space inside.

Can you put solar panels on a container?

We put solar panels on a container for a guy who was powering an RV on his land. He had a generator, and the container was full of batteries to support himself. When we're on top of a container, we need to build a custom racking system to hold up more than one row of panels, which is what we ended up doing for him. (See in image with tan container.)
