

Solar panel fixing kit

Do you offer solar fixing kits for flat roofs?

We offer solar fixing kits for flat roofs, featuring a variety of solar panel mounting solutions, such as clamps, rails, brackets, and screws, that are weighted down to avoid penetrating or countermining flat roof fabrics. A range of ground mounted solar panels supports to suit almost any application.

What fixing brackets do I need for my solar panels?

We have set out our range of solar panels fixing brackets and associated PV mounting parts that make up the kit. Calzip claw fixing (suited to round seam clamp type bracket) Plain tile bracket (ideal slate or plain tile fixing part) Rafter fixing (attaches to corrugated timber roofs)

What are solar panel mounting kits?

Our solar panel mounting kits are designed for secure, reliable, and easy installation, whether on the roof or ground-mounted. These kits include every necessary part, from solar panel mounting brackets to support structures, ensuring a seamless and safe setup for any size solar panel.

How do I choose the right solar panel fixings?

Selecting the right solar panel fixings requires careful consideration of the type of solar panels being installed. Whether you're working with monocrystalline, polycrystalline, or thin-film panels, ensuring compatibility between the panels and the mounting system is essential.

What is included in a solar panel kit?

Each standard kit includes rails, black end caps, stainless steel rafter fixing brackets, stainless steel fixing screws, slate bracket flashing kit, T bolts and nuts, rail joiners and fixing clamps to match your solar modules. All parts included in this kit are as follows:
