This modular system comes with a variety of roof thicknesses, doors, walls, and custom options to help you can create an affordable 3 or 4 season sunroom perfect for your lifestyle and budget! C-Thru manufactures all sunroom components, windows and doors under one roof keeping all quality assurance in house!

Are sunroom walls insulated?

insulated walls only system that the average homeowner can do. All your sunroom walls come prefabricated in sections, specifically sized for your openings. Using our patented Duralite window technology, all windows are preassembled and numbered, ready to be installed in the wall panel.

Where should a sunroom be built?

Ideally, a sunroom should be built facing south where the sun can shine on it continuously throughout the day. If that's not an option, then choose an east-facing sunroom to enjoy the sunrise or a west-facing sunroom for evening sunsets. If you're planning to use it as a dining area, try to plan it as close to the kitchen as possible.

What makes a sunroom a great addition?

Sunrooms are the perfect four-season addition to increase the view and create a focal point for any home or business. Solar Innovations's custom designed structures include durable aluminum framework. They are tailored with the most comprehensive line of aluminum accessories in the industry.

What are the benefits of having a sunroom?
