

Solar photovoltaic panel fixing

Should I fix a broken solar panel?

Choosing not to fix a broken solar panel in your system is sometimes an option. However, remember that many homeowner's insurance policies and some warranties cover certain types of damages to solar panels. Following up on repairing or replacing broken parts may be in your best interest.

How to fix solar panels at an angle?

At INDEX you can find a wide range of fixings and accessories designed specifically for this purpose: Adjustable triangles. They are ideal for fixing solar panels at an angle and are mainly made of steel and aluminium. They are used as a complement to the support and help to regulate the inclination of the panels on the roof.

Do solar panels need fixings?

For instance, some solar panels may require specific fixings designed to accommodate their size and weight, while others may need flexible systems that adjust to different roof spaces. Ground-mounted systems also demand different fixings compared to roof-mounted setups, especially when considering the weather conditions in your location.

How do I choose the right solar panel fixings?

Selecting the right solar panel fixings requires careful consideration of the type of solar panels being installed. Whether you're working with monocrystalline, polycrystalline, or thin-film panels, ensuring compatibility between the panels and the mounting system is essential.
