

South Korean Communication Base Station Wind Power Construction Tender

What is South Korea's offshore wind power bidding plan?

The capacity of the proposed bidding round is in line with South Korea's Offshore Wind Power Competitive Bidding Roadmap, unveiled in August 2024, and its Public-led Offshore Wind Bidding Plan released in March 2025. In addition to offshore wind, the Asian nation will offer for tender up to 1 GW of solar photovoltaic (PV) capacity.

When will offshore wind tenders start in South Korea?

According to South Korea's Ministry of Trade, Industry and Energy (MOTIE), the competitive bidding for offshore wind will be taking place twice a year. The floating offshore wind and onshore wind tenders are planned to be launched in the second half of this year, and the capacity offered will depend on demand and the remaining volume.

Will South Korea bid for offshore wind projects in 2025?

South Korea's Energy Agency has announced a competitive bidding for offshore wind projects with a capacity of 1.25 GW and 1 GW solar projects in the first half of 2025. The offshore wind tender for the first half of this year will focus on fixed-bottom projects.

How much will South Korea's offshore wind power auction cost?

The ceiling price has been set at KRW 176,565 (USD 128.6/EUR 113.3) per MWh, the same as in last year's auction. The capacity of the proposed bidding round is in line with South Korea's Offshore Wind Power Competitive Bidding Roadmap, unveiled in August 2024, and its Public-led Offshore Wind Bidding Plan released in March 2025.

How many MW of offshore wind will South Korea offer?

Out of the total 1.25 GW capacity, 500 MW will be offered through the public-led bidding market, with the remaining 750 MW designated for the general bidding market. According to South Korea's Ministry of Trade, Industry and Energy (MOTIE), the competitive bidding for offshore wind will be taking place twice a year.

What is the deadline for a wind project in South Korea?

Deadline is on 22 November 2024. South Korea has launched tenders for nearly two gigawatts (GW) of wind projects. Broken down, 1 GW has been set aside for fixed bottom offshore, 500 megawatts (MW) for floating offshore, and 300 MW for onshore wind. Deadline for a project depends on its division and capacity.
