

Swiss Solar Orchard Power System

Who makes Swiss solar modules?

SSWISS GROUP AG manufactures high-quality solar modules and is leading and globally active technology company. SWISS solar modules are engineered in Switzerland and meet the highest quality standards. As an internationally recognized premium brand.

What is the most powerful solar module in Switzerland?

Find out everything about the M490, our most powerful solar module in Switzerland, which perfectly combines efficiency and aesthetics. Bifacial modules use not only direct sunlight on the front side, but also indirect and diffuse light on the rear side. Your Swiss solar manufacturer for innovative solar modules and photovoltaics.

How many hectares can a photovoltaic system power in Switzerland?

In Switzerland, nearly 4,600 hectares could be considered, representing a power of 5 gigawatt-peak, equivalent to the consumption of 800'000 to 1'200'000 households. The ambition is to bring a new solution for large-scale photovoltaic deployments, without additional impact on land and reducing the carbon footprint of crops.

Why should you choose Swiss Solar AG?

The state of the art design of solar the packaging and solar modules makes the product emotionally attractive to the most demanding customers. Stylish packaging sets the product apart from other producers. To be part of SWISS SOLAR AG is to always be ahead.

This novel system is a major step towards energy transition in Switzerland, as it has shown that there are immediately scalable, innovative ...

List of Swiss solar panel installers - showing companies in Switzerland that undertake solar panel installation, including rooftop and standalone solar systems.

The secret's buzzing in their orchards - literally. Orchard energy storage batteries are transforming agriculture faster than a ripe peach falls from the tree. But before you think this is ...

EQUIPMENT USED IN THE SET: - solar module SWISS IBEX 144BF-MHC-TOPCON 580Wp 30/35mm black frame (18 units) - inverter Sofar Solar 11KTLX-G3 (1 unit) - profile solar 0146 ...

The electricity sector in Switzerland relies mainly on hydroelectricity, since the Alps cover almost two-thirds of the country's land mass, providing many large mountain lakes and artificial ...

Learn about solar incentives and rebates available in Switzerland. This guide explains national and cantonal programs that provide financial support for installing solar PV ...

Swiss Solar Orchard Power System

At least 97% of nominal power during first year. Thereafter max. 0.415% degradation per year. At least 86.63% of nominal power up to 25 years. At least 84.55% of nominal power up to 30 years.

Uncomplicated and cost-effective - rooftop photovoltaic systems from Megasol are quick and easy to install. Protect your vehicles and generate electricity at the same time. Discover our ...

A fruit grower in Egnach, Switzerland, has built an agrovoltaic system to protect 1,500 cherry trees from sun and rain while producing clean energy. A sustainable innovation ...

The construction of insolagrins Conthey in Valais (Switzerland), a highly innovative solar power plant, provides some elements of answer. This is the first time - worldwide - that ...

SWISS solar modules are engineered in Switzerland and meet the highest quality standards. As an internationally recognized premium brand. Exclusive packaging created by our designers ...

From preventing frost damage to powering robotic harvesters, the modern orchard energy storage battery is rewriting the rules of sustainable agriculture. And hey, if nothing else, imagine the ...

Zurich/Renens/Leuggern - Energie 360° and Insolight are creating an agricultural solar plant on a cherry farm spanning 12,000 square meters in Leuggern, Switzerland. This ...

By leveraging solar power, orchard owners can lessen their carbon footprint while keeping their trees healthy and fruitful. Regardless of whether ...

Solar power has enormous potential: by 2050, more than 40 percent of future electricity demand is expected to be met by photovoltaics. The utilisation of solar heat with the aid of a solar ...

Voltiris has launched its latest greenhouse pilot project, installing its novel wavelength-selective PV system at a vegetable growing farm in Canton Baselland.
