

# Tariffs on bifacial solar panels

Are bifacial solar panels subject to tariffs?

Bifacial solar panels generally used in utility-scale solar projects are not currently subject to safeguard tariffs under Section 201 of the Trade Act of 1974. After the Trump administration implemented an exclusion for bifacial modules, they now make up almost all U.S. solar panel imports, the White House said.

Did Biden put bifacial solar panels back under Sec 201 tariffs?

The Biden Administration today put imported bifacial solar panels back under Sec. 201 tariffs, after the specialty solar panels enjoyed a two-year exemption from extra duties first initiated by President Biden in 2022.

Will bifacial solar panels lose exemption?

In addition to bifacial panels losing their exemption, the Biden Administration said it will raise the tariff-rate quota (TRQ) of silicon solar cells by 7.5 GW, if needed.

Will bifacial solar panels be exempt from Section 201 duties?

President Biden issued Proclamation 10779, ending the exemption from Section 201 duties on bifacial solar panels imported on or after June 26. Find out if your products are affected.

Why are bifacial panels exempt from tariffs?

Bifacial panels were originally exempt from the tariffs because there was no significant domestic manufacturing capacity of the specialty product. This caused more bifacial modules to be imported into the United States than monofacial panels, undermining the objectives of the original safeguard measure.

Why did the president remove bifacial solar panels?

The Office of the President has turned its focus to solar panels, announcing the removal of the bifacial solar panel Section 301 tariff exclusion and addressing issues of stockpiling during trade cases, alongside promoting the nation's manufacturing base. From pv magazine USA
