

The power of the rooftop base station is turned off Is there any battery left

How do I know if my base station is running on battery backup?

If your Base Station is running on battery backup, the battery icon on the Base Station details page in the Ring app will reflect this. Also, the power icon on the base station will flash yellow when it is running on battery backup. When power returns, the battery will recharge until it reaches full power.

How long does a base station last?

When the Base Station starts using battery backup, it will work normally for 15 minutes. After 15 minutes, the Base Station will continue to monitor your sensors and send alarm signals, but will shut off any other features to preserve battery life. Depending on your usage, there is enough battery power for up to 24 hours.

Does my base station have a battery backup?

Your Base Station includes a battery backup that allows your system to keep working if the power goes out or your Base Station is accidentally unplugged. When the Base Station starts using battery backup, it will work normally for 15 minutes.

How do I turn off a base station when SteamVR is closing?

You can enable the setting in steamvr where the base stations are turning off when steamvr is closing and turning on when steamvr is starting. There is no need for smart switches, when the base stations have the functionality. Btw on Android you also can use the App "Light House PM" to turn on and off your base stations.

What happens if the base station goes offline?

Note: If the Base Station goes offline, you will be unable to access or control your devices through the app, but your device will remain armed, and the Ring Alarm siren will still function. Your Ring Alarm usually communicates with you or your monitoring service through the internet via wifi or an Ethernet cable.

Why do base stations turn off every night?

This is due to the ramp up and down of the motors being turned off and on putting wear on the device. BUT... for ever 1 person whose base stations have been on for 2 years straight and been perfectly fine, there is also 1 person who has them hooked up to a smart switch and turns them physically off every night.
