

UK new photovoltaic panel selling price

How much do solar panels cost in the UK?

The most common type of system is the 4kW solar system, which costs between £5,000 - £6,000. It can save the average household about £660 per year, provided that they have a decent number of sunlight hours and are installed on a south-facing roof. In 2025, the price of solar panels in the UK can vary depending on several factors.

How much does a photovoltaic system cost in the UK?

o A household in the UK installs a 5kW photovoltaic system costing £8,000 (average cost), which would generate approximately 4320 kWh of electricity annually. o The annual SEG income in the UK would be £324 per annum.

How much do monocrystalline solar panels cost?

The exact cost of monocrystalline solar panels will vary depending on the manufacturer and the size of the solar panels. As a rule of thumb, monocrystalline solar panels have their highest price point at about £1 - £1.50 per Watt. Polycrystalline solar panels, on the other hand, have a lower efficiency rating than monocrystalline panels.

How will the UK make solar more affordable?

The UK government has introduced a number of measures to make solar more affordable. One of the most significant is the temporary removal of VAT on domestic solar panel installations, which runs until 2027. Normally, VAT would add 5% to the total bill, but until that deadline households pay zero VAT on panels, batteries, and related equipment.

The price of installation solar panels UK varies based on several factors, including the size of the system, the type of panels you choose, and installation complexities.
