

In December 2020, DOE released the ESGC Roadmap, the Department's first comprehensive energy storage strategy to develop and domestically manufacture energy storage technologies ...

Learn more about DOE's energy storage activities supporting DOE's energy storage mission and vision through the Energy Storage Grand Challenge.

The Division advances research to identify safe, low-cost, and earth-abundant elements for cost-effective long-duration energy storage. OE's development of ...

As renewable power generation accelerates and concerns around the capacity and resiliency of energy grids grow, companies are increasingly exploiting and developing energy ...

The DOE Global Energy Storage Database provides research-grade information on grid-connected energy storage projects and relevant state and federal policies. All data can be ...

The Department of Energy (DOE) Loan Programs Office (LPO) is working to support deployment of energy storage solutions in the United States to facilitate the transition to a clean energy ...

The Mossy Branch Battery Facility is capable of 65 megawatts (MW) of battery storage that can be deployed back to the grid over a four-hour ...

The Mossy Branch Battery Facility is capable of 65 megawatts (MW) of battery storage that can be deployed back to the grid over a four-hour period, adding resiliency to the ...

2 days ago; A render of Google's planned Redhawk Phase 2 data centre in Arizona. Image: Google / Stone Applications, LLC / Mesa. Tech giant Google has announced a partnership ...

The GSL is an energy storage research and testing facility that will accelerate development of next-generation grid energy storage technologies that are safer, more cost ...

e-STORAGE is committed to driving sustainable energy solutions throughout North America, a region poised for significant growth in renewable energy adoption. Our recent ...

The US Department of Energy's (DOE's) Office of Electricity (OE) has announced funding of up to US\$15 million for three storage technologies.

Listed below are the five largest energy storage projects by capacity in the US, according to GlobalData's

US Energy Storage Project Branch

power database. GlobalData uses proprietary data and analytics to ...

The GSL is an energy storage research and testing facility that will accelerate development of next-generation grid energy storage technologies ...

Following similar pieces in 2022/23, we look at the biggest energy storage projects, lithium and non-lithium, that we've reported on in 2024.

The Department of Energy's (DOE) Office of Electricity (OE) is pioneering innovations to advance a 21st century electric grid. A key component of that is the ...
