Can a 12V solar panel use a 24V inverter?

A 12V solar panel must use with a 12V inverter and a 24V solar panel must use with a 24V inverter. On top of that a series connection is required to maintain the same voltage between the battery, inverter and the solar panel. Check out 12V, 24V and 48V inverters here. To keep things simple, just remember to keep the voltage the same.

Should I buy a 12V or 24V inverter?

So when it comes to buying an inverter you will decide on either a 12v (for small loads) or 24v (medium to large loads). It will most likely have a modified sine wave output, with 220v PD. If you've never used a multimeter before then I wouldn't recommend you play around with electricity without someone with a bit of experience.
