

Wave tile solar panels

What is A Midsummer wave solar panel?

Midsummer WAVE is a wave-shaped solar panel that follows the shape of your roof tiles. The product is suitable for Sweden's most popular roof tiles Palema from Benders, Jönåker from Monier and Mjöbäck/Ekeby from S:t Eriks and is either sold as a retrofit on existing roof tiles or as a complete roof renovation.

What is A Midsummer wave solar roof?

With Midsummer's solar roof, you no longer have to compromise between solar energy and aesthetics. Midsummer WAVE is a wave-shaped solar panel that follows the shape of your roof tiles.

What is a wavy solar panel?

A wavy solar panel that follows the shape of roof tiles. The product is sold as a retrofit on your existing roof tiles or as a complete roof replacement. Why choose Midsummer? Midsummer's solar cells are a Swedish innovation and are manufactured both in Sweden and Italy.

Can I get A Midsummer wave solar panel in black?

The Midsummer WAVE solar panel is only available in black. Your roof tiles can be in any color, but black is most suitable as the roof tiles will be perceived as black. We are happy to receive a drawing of your roof as a PDF, so that we can produce as accurate a quote as possible.

Why do solar panels cover 5 roof tiles in a row?

The solar panel covers five roof tiles in a row and the cables are hidden under the tiles for both protection and aesthetics. For you who think that aesthetics and sustainability belong together. Midsummer WAVE is a Swedish innovation manufactured at the Midsummer production facility in Sweden.

Can a tile roof handle solar panels?

If you have a tile roof and are considering solar energy, you might be wondering whether your roof can handle solar panels. Tile roofs--especially lightweight cement or clay tiles--are beautiful and durable but also delicate. Unlike asphalt shingles, they can crack easily under pressure, which makes solar installation a bit more challenging.
