

# What to do if the base station runs out of power

How do I fix a broken base station?

Don't hold the button down. If that doesn't work, power cycle the Base Station. Here's how to do it: Unplug it. Open the battery compartment. Take out the battery. Keep everything unplugged and removed for about 30 seconds or more. Plug in the Base Station. Reinsert the battery.

How do I know if my base station is running on battery backup?

If your Base Station is running on battery backup, the battery icon on the Base Station details page in the Ring app will reflect this. Also, the power icon on the base station will flash yellow when it is running on battery backup. When power returns, the battery will recharge until it reaches full power.

How long should a base station last?

Base Stations should have a very long life span, even if the power management modes we offer are not used, however. Using the power management features will increase the life span further by leaving the laser and/or rotor disabled (depending upon the mode) when inactive. Feel free to share this if you like.

Does my base station have a battery backup?

Your Base Station includes a battery backup that allows your system to keep working if the power goes out or your Base Station is accidentally unplugged. When the Base Station starts using battery backup, it will work normally for 15 minutes.

Should I Turn Off my base stations?

If you activate your base stations once a day or less, I would turn them off. If you often jump in and out of VR sessions, I'd keep them running. It's similar to HDD motors, as in they are happy to run continuously. But constant on/off can become a problem. Of course. Things don't wear down when they're off.

How do I Reset my base station?

First, try restarting it by plugging it into a working outlet and lightly tapping the "Reset" button on the back with a pushpin or paperclip. Don't hold the button down. If that doesn't work, power cycle the Base Station. Here's how to do it: Unplug it. Open the battery compartment. Take out the battery.

SteamVR's Base Station Power Management feature is turned OFF by default. Turning this feature ON ensures that your Base Stations power off when not in use to reduce power usage ...

Base Stations should have a very long life span, even if the power management modes we offer are not used, however. Using the power management features will increase ...

Am I the only one who runs their entire base on a single power grid? I can't be bothered to set up remote

# What to do if the base station runs out of power

power stations, much easier to just run power lines ...

13.8v and 30a is fairly standard for a shack. That radio should run from 11.73v to 15.87v but at 12v and 5 amps, you'll probably put too much demand on that little power supply. I use a switching ...

How to power up the base with fuel? Why do I get the no power notification when the generator is full in Dune: Awakening? Where is the generator? What is the station powered limit?

I've tried running it off of an extra UPS before, but it didn't work as well as I'd hoped. The runtime wasn't nearly as long as I'd expected given the size of the battery.

Base Stations should have a very long life span, even if the power management modes we offer are not used, however. Using the power management features will increase the life span ...

This will be indicated by the Orange Lightning Bolt LED on the Base Station. It will remain in this state until power is restored or until the battery runs out.
